In a fresh spin on the series, we're working at Tom Nook's Homes setting up houses for the hundreds of little animal villagers that can populate our new town. We get to customize everything for our residents, including who moves in, the inside & outside of their houses with items & furniture both classic & brand new, as well as build special stores & public buildings on main street where they can visit, shop, or work. We'll also use the new Animal Crossing amiibo cards to pick & choose who gets to move into the village. Thanks for joining me in this gameplay walkthrough. We're going to help design homes for our town, unlock as many amiibo villagers as possible with the NFC Reader, check out other players' houses online, and make lil Lottie proud in our new job. We'll be ending with my review of the game once we've played through all of the content. On top of that, I'll cover any new Animal Crossing updates that come out. Thanks for watching guys, and I hope you enjoy the series! Design it! Show off your style by designing homes for all of your favorite Animal Crossing villagers! Use your creativity to design the perfect houses - inside and out- for both old and new friends. With the new amiibo cards, you can call your favorite villagers into the game. As a new member of Nook's homes, you'll be able to design the interior and exterior of homes for more than 300 animal villagers. Talk to the villagers to take on design requests, and decorate using items from your in-game catalog or items the villagers brought with them - the more requests you take on, the more your catalog of usable items and decorations will grow! You can even view homes and facilities designed by other players in the "Happy Home Network," which is available through an in-game patch, and rank them in four different categories: cute, cool, unique, or "I want to live here." You can create your own custom designs, which can be saved and shared on Miiverse and other social networks with the Nintendo 3DS Image Share service, or you can turn your designs into a QR Code Pattern. Help Isabelle and leave your decorative touch on the buildings on Main Street. You'll be able to decorate the school, hospital and many other public facilities. The game comes with an amiibo card, and others can be purchased in packs. Collect and share amiibo cards of your favorite villagers and invite them into your game. Take on their design requests, or invite up to four characters into a completed room to hang out by tapping their amiibo cards to your New Nintendo 3DS system. Many can even be assigned roles in facilities around town, like a teacher in the school or a doctor in the hospital. Tap the amiibo cards of special characters to call in animals that would otherwise not appear in your game with requests, like DJ K.K. or Isabelle. Note that the New Nintendo 3DS systems have built-in NFC communication with amiibo cards. To be compatible with amiibo cards, Nintendo 3DS and Nintendo 2DS systems require an NFC Reader/Writer, which is sold separately at a suggested retail price of \$19.99.
